

TELEMANDO REMOTE CONTROL DEVICE

Emergency lighting

230V IP20 Ta(°C)
0/+40

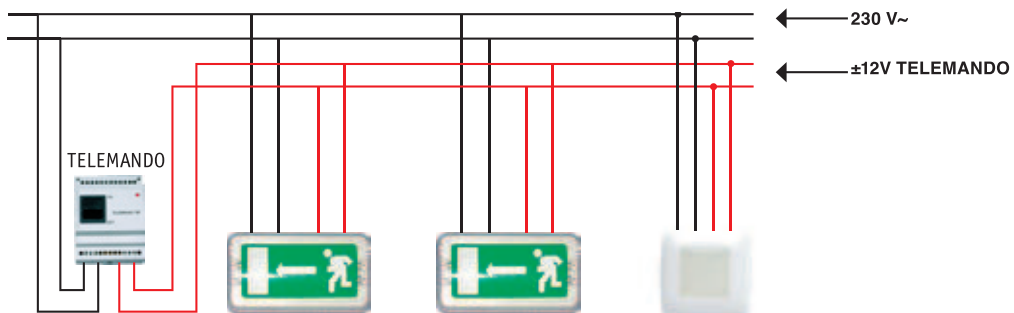

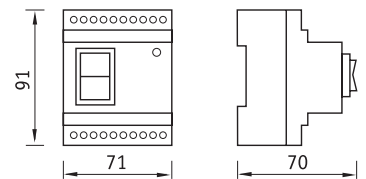

TELEMANDO

Telemando works as a remote control verification to test the power working of the luminaries and also permit to switch OFF/ON the luminaries in emergency stage.

With power; it allows one verification test of the luminaries.

Without power; it allows SWITCH OFF/ON the luminaries saving the battery power and the unnecessary battery discharge.

You can connect different types of emergency lights and set on a DIN rail.

CONVENTIONAL / LED LAMP
